

# Soul

A large, white, ornate decorative flourish with flowing, leaf-like patterns extends from the bottom of the word 'Soul'.

  
WALL ART  

Adding Soul to Your Walls

Create breathtaking spaces in your home or workplace by choosing from our extensive range of wallpaper or 3D Tiles, hand-picked to suit varied tastes and budgets. Add warmth and elegance to your living room, bedroom or even your pantry, or create a unique atmosphere in your hotel, restaurant or office by bringing some personality to bland walls.

Wall Art (Pvt) Ltd is the first and only exclusive retailer of globally renowned wallpaper brands in Sri Lanka. We offer over 15,000 wallpaper designs from Europe and the United States to suit any mood or taste.

We provide other design options such as 3D tiles for walls in 20 designs. The 3D tiles come in 20"x20" inches and can be used to create great feature walls at home, in apartment complexes, hotels, casinos, restaurants, night clubs, or offices. They are lightweight, durable and available in white and can be painted over in any colour to match any interior.

The advantage of choosing Wall Art wallpaper is that we have a wallpaper installation crew that provides free installation services within Colombo. For projects outside Colombo, only a transportation fee is charged. Additionally, we provide quick service – Wall Art can schedule the installation of wallpaper 10-15 days from the date an order is placed.

# Why Wallpaper?

- Less Maintenance - Painted surfaces usually require more maintenance - they need to be cleaned more often and may require repainting every 2 to 3 years.
- Longer Life Span - Wallpaper generally has a life span of between 8 to 10 years.
- Washable - Can be cleaned using a soft sponge with mild soap and warm water.
- Covers Imperfections - Can cover imperfections such as hairline cracks on walls that paint is incapable of.
- Better colour fastness – Wallpaper retains its original colour for a long time period.
- Fire retardant – Wallpaper will not catch fire and spread flames.
- Eco-friendly - All our wallpapers are recyclable. When installed in air-conditioned rooms, our vinyl range of wallpaper does not allow the external transfer of cool air, allowing you to switch off an AC faster because the room retains the cool air. Due to this, it is estimated that a household can save up to 7% on air conditioning bills. Some of our ranges of wallpaper are made from wood from sustainably managed forests.
- Unmatched Look - Improves the value of a house or apartment.
- Quick Installation – Wall Art has a team of skilled installers that are capable of wallpapering a room in 4 to 6 hours, while a typical painting job requires several days to complete. Also, if you wish to change the wallpaper, the product is easily strippable – and leaves no residue.
